**Biodynamic Farm in Spello  
Umbria ITALY**

# The farm

- ❖ 200 ha. In the centre of the Umbrian valley
- ❖ We produce cereals, legumes, extra virgin olive oil and forage that feed our 250 Chianina breed cows
- ❖ 26 years of experience in the application and research of sustainable agricultural practices
- ❖ We strive to produce vital food by experimenting with new sustainable agricultural techniques

# Our experience

- ❖ Our origins as a farming family date back to the second half of the 1800's from that point forward we became a benchmark in olive and tobacco agriculture. I am the fourth generation in the line of this farming family and after I obtained the diploma in agricultural sciences I dedicated my time to create a multifunctional farm re-converting its land into organic, to produce healthier quality food.
- ❖ We introduced the organic agriculture 1992 and 10 years later we have started our adventure with the biodynamic agriculture. Finally in 2014 we have discovered the use of E.M. (Effective Micro-organism) and had applied and experimented in our soils.
- ❖ In the last 5 years we had concentrated our efforts in creating a short supply chain through the creation of two organic restaurants the first in a farm holiday house in Spello and another one in the city of Terni. From this year the restaurant management has been passed on to the staff.

# We collaborate with

LE DUE  
TORRI

# We strive

- ❖ To produce vital high quality food that contributes to the health of the human being by enhancing the welfare of the Earth
- ❖ To create international alliances to develop and support in the Umbrian territory new agricultural practices that respect the environment and improve the quality of the soil and that of the food produced.
